

Lancashire HR Employers Forum

Wednesday 28th November 2018

Marc Mcloughlin, Managing Director, KeyFleet

Driving for Work 101

Many staff in HR roles are affected by fleet risk and driver management at least to some level. In fact it's often a responsibility that defaults to the HR department. Provision of vehicles, licence checking, authorising personal vehicle usage and mileage reclaims, checking grey fleet insurance to name just a few tasks that might fall to the HR team. In this session Marc will give a general overview to the risks involved for employers and their staff by their 'Driving for Work' activity including some tips about how to address and manage this risk.
